

How to make a cardboard snappy crocodile

You will need:

Cardboard

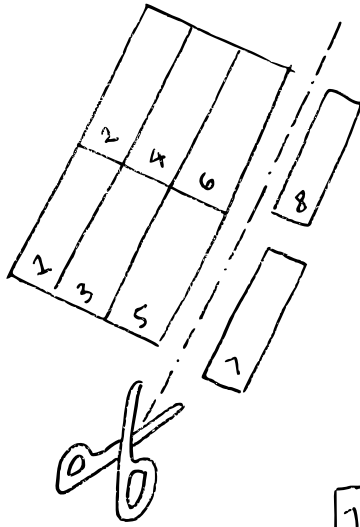

Scissors

Split Pins/Paper

Fasteners

Glue

Felt tips/paints

1.

Start by cutting 8 identical strips of cardboard

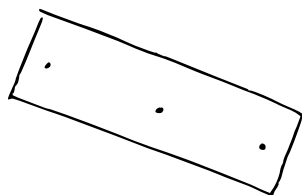

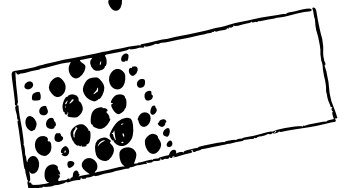

And cut out some jagged teeth into the last two strips

2.

Decorate each piece to make it look like crocodile skin.

Get creative! I gave mine green spots and a spooky lizard eye...

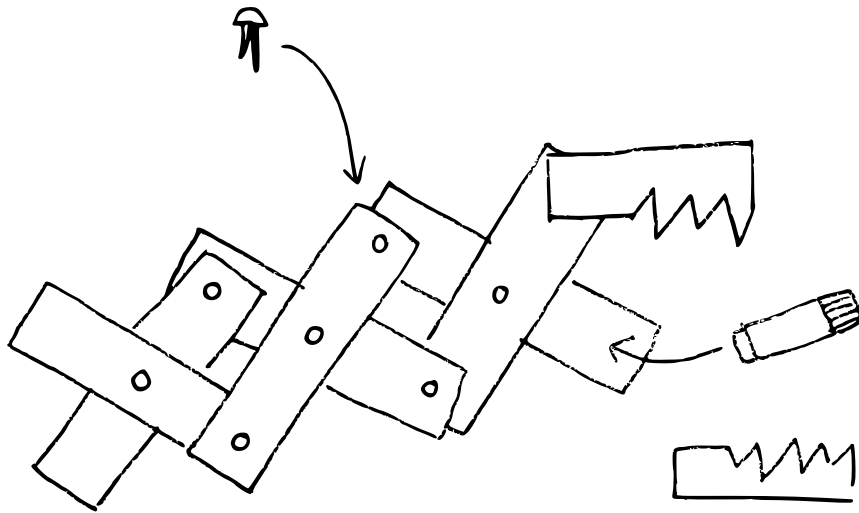

3.

Mark the mid-point and edges with pencil dots.

4.

Attach the croc pieces together at the centre and edges by pushing split pins through the points you marked earlier.

5.

Glue the jagged pieces to one end of the croc to make the teeth.

**Congratulations, you've made yourself a new
reptilian pal!**
